

Annual Scientific Meeting

Breakthroughs and Advances in Clinical Science in 2010:

An update on Practical Skills for Patient Care and Practice Management

Date/Time: Sunday, May 23th, 2010 9:30 am - 5:30 pm

Location: Sheraton Hotel, 135-20 39th Ave Queens, New York, NY 11354

Program Chairs: Calvin Pan, MD; Pauline Lau, MD; David Zhang, MD; Lisa Eng, DO

PROGRAM OVERVIEW:

The purpose of this CME activity is to introduce new clinical paradigms, novel early detection technologies, and new therapeutic options for the prevention and management of a wide range of important medical problems. Colon cancer, lung cancer, chronic viral hepatitis, liver cancer, diabetes, ophthalmology, and osteoporosis among the diseases considered with a view towards noninvasive diagnosis and cost effective management based on the recent breakthroughs and advances in clinical science.

PROGRAM GOAL:

To provide a comprehensive update on the current management in wide range of common medical problems and address the important issues in clinical practice for practicing primary care physicians and other healthcare professionals caring for patients in primary care setting.

EDUCATIONAL OBJECTIVES:

After completing this program, participants should be able to:

1. Understand the emerging concepts in detection, evaluation and new treatment options for the common medical problems.
2. Discuss current and future trends in practice management; appreciate contemporary issues in financial management of private practice.
3. Incorporate preventive and therapeutic management strategies into practice to improve patient care.
